

## P. Body

Hook Size: #10 - #16

Style / Make: Tiemco 200R BL

Thread: light olive

Tying Materials:

1. Body – peacock herl wrapped with black thread
2. Rib – small copper wire, counter wrapped
3. Hackle – any desired soft hackle material

Comments: Fish across a riffle and down current. Anticipate a hookup or rise at the end of the drift. I have had good luck with this fly both in the Sierras and in the White River region.
